EDUCATION

NBI/Handelsakademin

2022 - 2023

Object oriented Development with AI Competency

The Game Assembly

2024 - 2027

Game programmer

SKILLS

PROGRAMMING LANGUAGES

Main language

- C++

Secondary languages

- C#, Python, HLSL

TECH

- DirectX 11

VERSION CONTROL

- Git, perforce

LANUGAGES

Swedish - Native

English - Fluent

PROFILE

Driven game developer that has focused on tool and engine development. I like working closely with other disciplines.

In projects, I have mainly worked with graphics pipelines, developing plugins to export material data from Unreal to JSON, graphics engine development and making tools to help or simplify others work.

HIGHLIGHT WORK FROM PROJECTS

- **Server Meshing Prototype (C++, Networking)**
  Designed a server meshing architecture for handling entity ownership and hand off between servers.
- **Unreal to Custom Engine Material Pipeline**
  Added functionality in plugin exporting material data to JSON for use in custom rendering pipeline.
- **Engine work**
  Editor Scripting and system for handling the running in engine.
  Particle system and editor

WORK EXPERIENCE

SOFTWARE DEVELOPER INTERN

Afry

Sept 2023 - Dec 2023

- Developed Python tools for spatial data processing, sorting, and visualization.
- Built a proof-of-concept LLM-based interface for interacting with structured data.
